\*Note: The U.S. GDP & Public Debt for 1973 to calculate 1974 growth %: GDP = \$1,356.00 Public Debt = -\$466.29

\*\*Note: New Home Annual Mortgage Interest comes from the Federal Housing Finance Agency (FHFA) Table 10 on the www.fhfa.gov/ website.

\*\*\*Note: GDP = Gross Domestic Product, which is the value of all goods and services produced within the U.S. economy in a year. The above data comes from Table 10.1 of the 2019 Federal Budget.

\*\*\*\*Note: M2 Money Supply = The total physical currency in circulation and in bank reserves plus money in checking accounts (M1) plus most savings accounts, money market accounts, retail money market mutual funds, and small denomination time deposits under \$100,000. The above data comes from the 11/29/2018 H.6 Statistical Release from the Federal Reserve.

\*\*\*\*\*Note: CPI = Consumer Price Index, which is a measure of inflation in the United States economy that considers what people spend on staple goods and services. It is calculated by taking the average of changes in price to a basket of goods and services compiled by the U.S. Department of Labor. The above data comes from Table B-10 on the Bureau of Labor Statistics website.
