

APPENDIX 15A

PROPOSED 8-YEAR COMPREHENSIVE AMERICAN STRATEGIC REFORM PLAN (ASRP)

<p><u>The Purpose of the American Strategic Reform Plan (ASRP) is to Promote:</u></p> <ol style="list-style-type: none"> 1. Unity 2. Accountability 3. Economic Growth 	<p>The proposed American Strategic Reform Plan (ASRP) would utilize the ten Universal Principles, which are derived from the Holy Bible, to promote unity, accountability, and true economic growth in America.</p>
<p><u>The Goals of the American Strategic Reform Plan (ASRP) are to:</u></p> <ol style="list-style-type: none"> 1. Eliminate the Gridlock Between the Political Parties in Washington D.C. 2. Return the Power of Government to the People 3. Provide Full and Equitable Employment for All Eligible American Citizens 	<p>The ultimate goal of the American Strategic Reform Plan (ASRP) would be to introduce legislation in Congress during an eight-year period that eliminates the gridlock in Washington D.C. between the political parties; return the power of government to the American people; and provide full and equitable employment for all eligible American citizens.</p>
<p><u>The Concepts of the American Strategic Reform Plan (ASRP) are Based on:</u></p> <ol style="list-style-type: none"> 1. Love 2. Truth 3. Transparency 4. Competition 5. Common Sense 	<p>The American Strategic Reform Plan (ASRP) would be based on the concepts of love, truth, transparency, competition, and common sense. The concept of love is embodied in the ten Universal Principles, which would be the foundation of our domestic and foreign policies. The concept of truth would be focused on discovering the facts about the problems we are facing as a nation, and then leveling with the American people as we work toward the solutions to those problems. The concept of transparency is that the people would partner with local, state, and national governments in the solutions to the nation's problems, and the Federal Government would provide regular financial and economic reports to the American people based on established business practices. The concept of competition is that there would be competition in the market place and all of the proposed fifteen industrial sectors would be competing for the best ways to serve the American people, rather than the best ways to swindle the American people for the benefit of very powerful and monopolistic special interest groups. The concept of common sense is that decisions would be made based on research and intelligence that lead to common sense solutions, rather than bribery and deception that corrupt the decision-making process.</p>
<p><u>The Ten Universal Principles are:</u></p> <ol style="list-style-type: none"> 1. Universal Principle #1 (UP-1) - Be fruitful and multiply and replenish the earth and protect innocent children. (Survival of the Family) 2. Universal Principle #2 (UP-2) - Subdue the earth by being good stewards of the natural resources created by God. (Natural Resources) 3. Universal Principle #3 (UP-3) - Eat the flesh of animals, if we desire, but refrain from eating their blood. (Atonement) 4. Universal Principle #4 (UP-4) - Exercise dominion over and be good stewards of all the living things created by God. (Environment) 5. Universal Principle #5 (UP-5) - Treat the life of every human being as sacred, and treat other people the way we want to be treated. (Social Harmony) 6. Universal Principle #6 (UP-6) - Remember the Sabbath Day to keep it holy by being a good steward of our physical body and mind. (Personal Well-being) 7. Universal Principle #7 (UP-7) - Recognize and acknowledge when we have been proven to be wrong. (Conviction) 8. Universal Principle #8 (UP-8) - Confess when we are wrong. (Confession) 9. Universal Principle #9 (UP-9) - Repent of our wrongdoing and ask God (if there is belief in God) and those we have wronged for forgiveness. (Repentance) 10. Universal Principle #10 (UP-10) Forgive those who have treated us wrong. (Forgiveness) 	
<p><u>The Objectives of the American Strategic Reform Plan (ASRP) are to:</u></p> <ol style="list-style-type: none"> 1. Fix Our Relationships 2. Fix Our Democracy 3. Fix Our Money 4. Fix Our Infrastructure 5. Fix Our Environment 6. Fix Our Foreign Policy 	<p>The American Strategic Reform Plan (ASRP) would enable the American people, by the power of their votes, to take back control of our national government through a comprehensive legislative agenda that would be focused on fixing our relationships, fixing our democracy, fixing our money, fixing our infrastructure, fixing our environment, and fixing our foreign policy. These objectives are designed to introduce legislation that addresses the systemic tools that the rich and powerful special interest groups have been using to control our local, state, and national governments, and to establish policies and programs that serve the American people and balance the federal budget.</p>

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
1. Fix Our Relationships	Utilize the ten Universal Principles to establish moral foundations to help transform individual and national consciousness from worldly attitudes of hate, self-righteousness, and judgment to spiritual attitudes of love, humility, and forgiveness.	UP-1, 2, 3, 4, 5, 6, 7, 8, 9, & 10	Establishes a moral basis to hold every individual man, woman, and child accountable for their behavior and actions.	X	X			
2. Fix Our Relationships	Utilize Exhibit 9A-Conflicting Principles Affecting the Character of Humanity to promote legislation that focuses on the Sins Against Humanity , and lets God deal with the Sins Against God , as long as they do not escalate into Sins Against Humanity .	UP-1, UP-5, UP-7, UP-8, UP-9, UP-10	Promotes universal cooperation, peace, and prosperity between the family, human government, and nations while maintaining personal freedoms.	X	X			
3. Fix Our Relationships	Utilize Exhibit 9B-Spiritual Relationship Profile Between God and Humanity to promote legislation that focuses on the spiritual goals of universal cooperation, peace, and prosperity between the family and human government without impinging on the freedom of individuals to choose how they will live their lives.	UP-1, UP-5, UP-7, UP-8, UP-9, UP-10	Provides the foundation for the separation of church and state and individual freedom for all who do not commit Sins Against Humanity .	X	X			
4. Fix Our Relationships	Work with Congress to implement the proposed Public Personal Identification System (PPIS), as an adjustment to the 2020 Census, to establish positive identifications of all the inhabitants in the U.S. and would provide instant background checks using fingerprint technology. It would also address the problems of illegal immigration, identity theft, pandemic tracing, voting, violence in schools, Congressional redistricting, artificial intelligence, terrorism, drug and human trafficking, fraud, and other crimes. See Appendix 13 for an organizational chart. (Department of Commerce) (Department of Justice)	UP-5	The PPIS would be accessible to the public through their cell phones and computers to check the identity of personal contacts and make immediate contact with law enforcement when suspicious activity is observed.	X	X			
1. Fix Our Democracy	Work with Congress to discontinue the Electoral College in presidential elections and distribute electoral votes to all the presidential candidates in proportion to the number of votes they receive in each state (one person, one vote). See Appendices 4A, 4B, 4C, 4D, and 4E .	UP-5	Ensures that voters do not lose their political power in elections, and that the will of the majority prevails in our democracy.	X	X			
2. Fix Our Democracy	Work with Congress to establish federal term limits for senators and representatives to two (2) six-year terms for senators and six (6) two-year terms for representatives. Implement plan for Congress and the Judicial Branch over a period of six (6) years.	UP-5	Ensures that elected officials are focused on serving the people rather than staying in power.	X	X			

Objective	Description of Proposed Legislation or Policy	<u>Universal Principle</u>	<u>Benefits of Legislation or Policy</u>	<u>Mid-Term 2026-2027</u>	<u>Mid-Term 2028-2029</u>	<u>Mid-Term 2030-2031</u>	<u>Mid-Term 2032-2033</u>	<u>Long-Term Plan</u>
3. Fix Our Democracy	Work with Congress to establish term limits for federal judgeships that now have lifetime terms to a term of sixteen (16) years, with terms staggered to allow the president to permanently appoint only one (1) Supreme Court Justice and approximately twenty (20) Justices of the Courts of Appeals during each four-year term in office. See Appendix 5A .	UP-5	Ensures that the ongoing decisions of the courts reflect the will of the people through their elected representatives.	X	X			
4. Fix Our Democracy	Work with Congress to develop standardized and unbiased congressional redistricting criteria and establish independent redistricting commissions within each state to eliminate the current practice of gerrymandering by incumbents to pick their voters before their voters pick them.	UP-5	Helps to ensure that voters are properly represented in Congress.	X	X			
5. Fix Our Democracy	Work with Congress to establish an official one-year process for the election of the president and provide a relatively inexpensive process utilizing the electors in each state for presidential candidates to solicit initial supporters and present their ideas to a national television audience. See Appendix 5B for a proposal. (Federal Election Commission)	UP-5	The proposal would enable the electors in each state to select the initial candidates from each party for the primary elections in each party..	X	X			
1. Fix Our Money	Work with Congress to dissolve or revise the Federal Reserve Act of 1913 in accordance with the February 25, 1927 amendment to the Act. Then transform our monetary system from a Debt/Credit-Based System to an Asset/Capital-Based System by transferring the twelve Federal Reserve Banks to the Department of the Treasury, and establishing Monetary/Appropriation Policy Committees (CMAPC's) in Congress to ensure that each sector of the national economy receives enough money to sustain quantified growth without fueling inflation. See Appendices 8B and 8C for the proposed budget organizational+ chart and the list of the proposed fifteen (15) Industrial Sectors, which are based on IRS Business Activity Codes. (Office of Management and Budget) (Government Accountability Office)	UP-1, UP-5	Banks and other lending institutions would no longer create money "out of thin air" by using fractional-reserve banking. Money would be backed by the total non-operational assets of the people (Federal Government). See Appendix 8A .	X	X			

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
2. Fix Our Money	Work with Congress to establish a Congressional Monetary/Appropriation Policy Committee (CMAPC) for each of the fifteen (15) Industrial Sectors and assign an Industrial Sector to each of the fifteen (15) Cabinet Departments in the Executive Branch. Each CMAPC would work with each Cabinet Department to develop and implement a balanced budget and start paying down the public debt. All of the independent government agencies and government corporations would report to one of the Cabinet Departments for budgetary purposes. With these reforms in place, we should be able to balance the Federal Budget in less than four years. See Appendix 8B . (Office of Management and Budget) (Government Accountability Office)	UP-5	Every elected official would have an area of responsibility they could show accountability for, and Congress and the President would have better control of inflation while serving the people and providing periodic business reports. See Appendix 9 .	X	X			
1. Fix Our Infrastructure	Work with Congress to continue design and construction contracts to continue the ongoing repairs and upgrades to infrastructure projects as identified by the American Society of Civil Engineers Report Card and the current administration. See Appendix 10A and 10B . (Department of Defense, Corps of Engineers)	UP-4, UP-5	Improve public and commercial access and avoid structural failures and loss of life. Improve the public quality of life.	X	X			
2. Fix Our Infrastructure	Work with Congress to establish a dedicated research team of scientists and engineers, similar to the WWII Manhattan Project for the atomic bomb, to determine how the half-lives of radioisotopes can be reduced or neutralized, such that the radioactive wastes and other byproducts of nuclear reactors can be recycled or safely disposed of, in a relatively short period of time, without potential damage to the environment. Begin the cleanup of existing nuclear waste dump sites. (Department of Energy, Oak Ridge National Laboratory)	UP-4, UP-5	Re-establish nuclear power as a future source of electrical power and clean up existing nuclear waste dump sites.	X	X			
3. Fix Our Infrastructure	Work with Congress and the energy industry to initiate contracts for the design and construction of solar panel farms in desert areas of the country with ways to store that energy and connect that energy source to the national power grid for added capacity. Continue to provide temporary tax incentives to households and companies that convert to solar power. (Department of Energy)	UP-4, UP-5	Reduction of greenhouse gases. Additional capacity to the electrical power grid. Temporary Reduction in income taxes.	X	X	X	X	X

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
4. Fix Our Infrastructure	Work with colleges and universities, the scientific community, and industry by the issuance of grants with goals and timetables and contracts to design and construct a modern upgrade to the national electrical power/communications grid. It is proposed that it be underground alongside the major arteries of the current interstate highway system and would connect to the various sources of electrical power generation and communications around the country. The sources of power would include the existing coal fired plants, nuclear plants, wind farms, and solar panel farms. (Department of Energy)	UP-1, UP-5, UP-2	By locating the power/communications grid alongside the current interstate system, it would also support a new generation of electrically powered transportation vehicles and reduce construction costs.	X	X	X	X	X
5. Fix Our Infrastructure	Depending on the success of the dedicated research team of scientists and engineers in recycling or neutralizing the radioactive wastes and other byproducts of nuclear reactors, work with Congress and the energy industry to begin initiating design and construction contracts for additional nuclear power plants to replace existing fossil fuel power plants and continue the cleanup of existing nuclear waste dump sites. (Department of Energy, Oak Ridge National Laboratory)	UP-4, UP-5	Re-establish nuclear power as a future source of electrical power and clean up existing nuclear waste dump sites.	X	X	X	X	X
6. Fix Our Infrastructure	Work with Congress to begin work on the design of a national flood control system that transfers the flood waters from flood-prone areas in the east to drought-prone areas of the west through the Grand Canyon by the use of pumps, canals, dams, and tunnels. The pumps and tunnels would be used to transport excess surface water from dams and rivers in flood-prone areas in the east to the Grand Canyon for transport to the west coast via the Colorado River. (Department of Defense, Corps of Engineers)	UP-2, UP-4, UP-5	Provide more sources of electrical power and surface water for the nation, which would reduce the consumption of ground water and help to replenish depleted water tables. Conserve fresh water.	X	X	X	X	X
1. Fix Our Environment	Work with Congress to provide tax incentives to encourage manufacturers to use upgrades to existing products, and stop using new technologies to force the short-term obsolescence of their existing products that are still working well to the satisfaction of their owner's, but are forcing owners to send very good and useful products to landfills. (Department of the Treasury)	UP-2, UP-4	This would revitalize the repair and product support industries and keep good quality products in circulation with continuing income to the manufacturer.	X	X			

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
2. Fix Our Environment	Work with state, local and national leaders and the agricultural community to develop agricultural reserves as a national asset to reduce the national impact of weather-related disasters, combat hunger nationally and abroad, and improve trade balances with other nations. As agricultural production exceeds the needs of the national and international market place, the excess production would be purchased from the market by the government, at a set percentage of market value, and stored as Agricultural Reserves to maintain competitive prices. (Department of Agriculture)	UP-1, UP-2, UP-4	The agricultural reserves would become a national asset to be used for disaster relief, hunger relief, and export trade negotiations with other nations around the world.	X	X			
3. Fix Our Environment	Work with Congress to initiate design and construction contracts to develop a large fleet of excess large military and civilian aircraft to firefighting equipment by installing huge fresh water tanks in their fuselages with quick-fill and quick-discharge capabilities. Then strategically locate these aircraft around the country at military bases and airports near fresh water sources to respond very quickly to forest fires, industrial fires, and potential terrorist attacks like 9/11. Run very large water pipes from the major water sources to the airport locations where the large firefighting aircraft are parked for quick deployment and refilling. Maintain and operate these aircraft by the military. See excess civilian aircraft boneyard at the following website: https://www.airplaneboneyards.com/commercial-aviation-airplane-boneyards-storage.htm (Department of Defense, Corps of Engineers)	UP-2, UP-4	Reduction of global warming due to forest fires. Drastically reduce the number of wild fires each year. Relief for droughts. Reduction in insurance claims, property damage, and loss of life for citizens. Excellent civilian training and disaster preparedness for the military.	X	X			
4. Fix Our Environment	Work with Congress to initiate design contracts for the development of prototype 100% recycling plants for all metals, paper, plastics, and rubber materials received from daily garbage pickups and the public. It is proposed that the recycled raw materials from these four areas be processed in modern, automated recycling plants that produce standard sized ingots or bricks of raw material for re-sale in the national and international market place. Any excess production of recycled products would be purchased from the market by the government, at a set percentage of market value, and added to the national reserves of these products as assets for later distribution. (Department of the Interior)	UP-2, UP-4	These recycling plants would provide new sources of revenue for state and local governments and new jobs for the recycling industry.	X	X			

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
5. Fix Our Environment	Work with Congress to initiate design and construction contracts for the development of prototype 100% recycling plants for the recycling or disposal of the following from the public and industry: all waste lubricating oils, non-hazardous chemicals and paints, and all hazardous chemicals and hazardous waste products. Establish recycling plants in strategic locations throughout the nation to prevent the continued contamination of fresh water resources. (Department of the Interior)	UP-2, UP-4	Any excess production of recycled products would be purchased from the market by the government, at a set percentage of market value, and added to the national reserves of these products as assets.	X	X			
6. Fix Our Environment	Work with colleges and universities, the scientific community, and industry by the issuance of grants with goals and timetables and contracts to develop processes that can recycle rubber tires into new tires and other products of equal or better quality than the originals by the use of polymers or other synthetic components. (Department of Education, National Science Foundation)	UP-2, UP-4	Drastic reduction in old tires going to landfills, being burned, and being illegally dumped.	X	X			
7. Fix Our Environment	Work with Congress to initiate contracts to begin the planning to reopen and modernize old foundries and establish new foundries for the recovery and 100% recycling of all military debris and obsolete military equipment and aircraft left from national military operations and foreign military operations by melting them down into ingots and adding them to the National Recycled Reserves. See excess military aircraft at the website, https://www.airplaneboneyards.com/post-wwii-military-airplane-boneyards.htm . Also find more high volume uses for the slag that comes from the smelting process. (Department of the Interior) (Department of Defense)	UP-2, UP-4	To provide raw materials for the rebuilding of the national infrastructure, new national projects, and resale to industry and foreign countries for revenue, which would reduce taxes and improve the export balance of payments.	X	X			
8. Fix Our Environment	Work with colleges and universities, the scientific community, and industry by the issuance of grants with goals and timetables and design contracts to design prototype processes and automated processing plants to convert household organic waste, animal parts from meat processing plants, human and other animal excretions, and dead animals into commercial fertilizers with maximum control of odor and minimum pollution of the environment. (Department of the Interior) (Department of Education, National Science Foundation)	UP-2, UP-4	The school grants would help to reduce the cost of a college education, and these processing plants would provide new sources of revenue for state and local governments.	X	X			

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
9. Fix Our Environment	Work with colleges and universities, the scientific community, and industry by the issuance of grants with goals and timetables and contracts for the development of prototype processes and equipment to remove and recycle harmful chemicals from wastewater such as glyphosate, estrogen, Prozac, and harmful discharges from industrial plants and sewage treatment plants before they are pumped into lakes, rivers and streams. Provide tax incentives for individuals and companies that convert to ecofriendly technologies and equipment. (Department of the Interior)	UP-2, UP-4	The new processes and equipment for recycling harmful chemicals would help clean up our waterways and reduce the harm to wildlife and marine life.	X	X			
10. Fix Our Environment	Work with colleges and universities and local communities to begin job training programs for citizens to address current job shortages, new technologies, new industries, new business opportunities, and new jobs that will be generated by new governmental and industrial initiatives. (Department of Education, National Science Foundation)	UP-1, UP-2, UP-4, UP-5, UP-6	Improved personal and financial environment for all Americans who are willing and able to work.	X	X			
11. Fix Our Environment	Work with Congress to initiate design and construction contracts to modify excess or outdated military ships, such as old aircraft carriers and military cargo vessels, to collect the existing concentrations of plastics and other debris that are floating in the oceans and transport them to various countries to be recycled in automated recycling plants. (Department of Defense) (Department of Commerce)	UP-2, UP-4	This could also be a source of income and jobs for entrepreneurs and underdeveloped countries.	X	X	X	X	X
12. Fix Our Environment	Work with Congress to initiate a design contract for a NASA-Styled program to develop vehicles for the exploration of the oceans to recover and recycle the sunken vessels from previous wars and civilian operations. An analysis of the sunken vessels of the major powers from World War II alone reveals that the total estimated displacement tons of sunken vehicles is about 2,546,359 tons, which are distributed as follows: Japan – 1,205,232 tons; United Kingdom – 480,400 tons; Germany – 366,464 tons; United States – 342,033 tons; and Italy – 152,230 tons. The materials not shared with the foreign nations from these sunken vessels would be recycled and added to the assets of the National Recycled Reserves. (Department of Defense)	UP-2, UP-4	Once established, the raw materials from this program should be much less expensive than mining the materials from scratch and much less damaging to the environment.	X	X	X	X	X
13. Fix Our Environment	Work with Congress to coordinate through NASA and other nations to start controlling the proliferation of space debris by developing space vehicles to recover space debris and bring it back to earth for analysis and recycling when deploying, servicing, and recovering satellites from space. (Department of Transportation, NASA)	UP-2, UP-4	Control of the proliferation of space debris.	X	X	X	X	X

Objective	Description of Proposed Legislation or Policy	Universal Principle	Benefits of Legislation or Policy	Mid-Term 2026-2027	Mid-Term 2028-2029	Mid-Term 2030-2031	Mid-Term 2032-2033	Long-Term Plan
14. Fix Our Environment	Work with Congress and the U.S. business community to export the processes and equipment developed from these new technologies and industries to other nations to help improve the overall global environment and improve America's balance of payments to other nations. (Department of Commerce)	UP-2, UP-4	Enables America to become a more powerful and influential leader in the fight to improve the earth's environment.	X	X	X	X	X
1. Fix Our Foreign Policy (Illegal Immigration)	Work with other countries, particularly the countries in North and South America, to improve social, political and economic cooperation between our countries, such that their citizens will have a stable and relatively secure and safe environment to live in. This would substantially reduce the number of people who are risking their lives and family fortunes to flee their countries to the U.S. to find freedom from excessive violence, coercion, abuse, and exploitation. (Department of State)	UP-1, UP-5	The proposed PPIS would help identify people entering and leaving the U.S. to gain better control of drug and people trafficking, which are the root causes of illegal immigration.	X	X			
2. Fix Our Foreign Policy (Illegal Immigration)	Before beginning the evaluation of the illegal immigrants already living in the U.S., establish agreements with the countries of origin for safe zones for non-criminal illegal immigrants who must be deported from the U.S. Stop the flow of illegal immigrants by utilizing federal, state, and local resources to detain illegal immigrants at the border crossings, add them to the PPIS, provide them with the proper paperwork and procedures to properly apply for immigration, and then transport them back to safe zones within their countries of origin for processing at a later date. Set a deadline date for all illegal immigrants in the U.S. to report to immigration authorities, be added to the PPIS, and document the circumstances surrounding their illegal immigration status. Any undocumented illegal immigrants discovered after the deadline date would be candidates for immediate deportation or prosecution. Anyone harboring undocumented illegal immigrants would be subject to a fine or other penalty. (Department of Homeland Security)	UP-1, UP-5	Provide safe zones in countries of origin for illegal immigrants who do not qualify for U.S. citizenship under the INA principles and guidelines and must be deported. Establish a procedure for processing all illegal immigrants that currently reside in the U.S. and those are deported by using the PPIS.	X	X			

Objective	<u>Description of Proposed Legislation or Policy</u>	<u>Universal Principle</u>	<u>Benefits of Legislation or Policy</u>	<u>Mid-Term 2026-2027</u>	<u>Mid-Term 2028-2029</u>	<u>Mid-Term 2030-2031</u>	<u>Mid-Term 2032-2033</u>	<u>Long-Term Plan</u>
3. Fix Our Foreign Policy (Illegal Immigration)	The documented illegal immigrants in PPIS would be forgiven for the first offense of being in the U.S. illegally and would be evaluated according to the current INA principles. The INA principle concerning the reunification of families would give special consideration to immigrants who qualify for Deferred Action for Childhood Arrivals (DACA) and Deferred Action for Parents of Americans and Lawful Permanent Residents (DAPA). These evaluations should provide a pathway to citizenship for those illegal immigrants who qualify under the INA principles and guidelines. Once the documented illegal immigrants have been processed, the existing immigration process at the southern border would be opened again and would continue to work as designed or modified. Immigration officials would begin processing new applications for citizenship, including the applications of the illegal immigrants that were transported back to safe zones. (Department of Homeland Security, Department of Justice)	UP-1, UP-5	Utilize the PPIS to identify and process all the illegal immigrants that reside in this country and all the illegal immigrants that have been deported from this country. Any previously deported illegal immigrants and any non-documented illegal immigrants that show up in this country would be subject to prosecution.	X	X			
4. Fix Our Foreign Policy (Illegal Immigration)	Utilize the proposed PPIS to address the root causes of illegal immigration to America, which is the financial success of illegal drug trafficking and human trafficking. The PPIS would be able to track the flow of people, illegal drugs, weapons, and money crossing the U.S. borders. U.S. drug enforcement authorities would be able to utilize the PPIS to move up the supply chain to the higher-level drug dealers, middlemen, and drug producers. They would need to establish close working relationships with the drug enforcement authorities in Mexico and other countries to extradite the drug traffickers to the U.S. for prosecution. Drug enforcement authorities in the U.S. and the other countries could negotiate to give the drug traffickers the option to turn themselves in to authorities. In return, the authorities would reduce their potential prison sentences, dependent on the severity of their crimes, and make it possible for them to eventually obtain their freedom. (Department of Homeland Security, Department of Justice)	UP-1, UP-5	The PPIS, using fingerprint technology, would be able to perform background checks and identify fugitives from justice, identity thieves, human traffickers, hackers, scammers, illegal aliens, and other criminals.	X	X			
5. Fix Our Foreign Policy	Work with other countries to back up their monetary systems with their natural resources, raw materials, and other capital resources (solid rocks), rather than the credit worthiness of each country (shifting sand). (Department of Commerce) (Department of the Treasury)	UP-2, UP-4, UP-5	America should build trade relationships that will provide economic benefits for our country as well as the other countries involved.	X	X			

<u>Objective</u>	<u>Description of Proposed Legislation or Policy</u>	<u>Universal Principle</u>	<u>Benefits of Legislation or Policy</u>	<u>Mid-Term 2026-2027</u>	<u>Mid-Term 2028-2029</u>	<u>Mid-Term 2030-2031</u>	<u>Mid-Term 2032-2033</u>	<u>Long-Term Plan</u>
6. Fix Our Foreign Policy	Work with other countries to develop a system that would allow the currencies of countries to be used as a medium of exchange, rather than a commodity, with the goal of establishing a stable worldwide standard for evaluating the currencies, commodities, natural resources, raw materials, and other capital resources of all countries. (Department of Commerce) (Department of the Treasury)	UP-2, UP-4, UP-5	To establish a worldwide system of trade and standardized procedures for the economic evaluation of all countries..	X	X			
7. Fix Our Foreign Policy	Export the technologies we develop for 100% recycling plants, and assist other countries in building recycling plants and finding applications for the recycled raw materials within their own country. The objectives of America would be to lead the struggle to recover the worldwide damage that has occurred to the earth's environment. (Department of Commerce)	UP-2, UP-4, UP-5	To improve the standard of living of the citizens of other countries, so that they will become better trading partners for all American products and services.	X	X			
8. Fix Our Foreign Policy	Outsource excess American jobs to other countries, particularly underdeveloped countries, to help them improve their standard of living and environment. The excess American jobs created by the new monetary system from investments in infrastructure and environmental projects, along with tax incentives to recover or replace the outsourced jobs that directly impact the social, economic, and military security of the country, would provide full employment for all Americans who are willing and able to work. (Department of Commerce) (Department of Education)	UP-2, UP-4, UP-5	The U.S. Department of Education would work with educational institutions and American industries to match the skills of the nation with the needs of American industries.	X	X			
9. Fix Our Foreign Policy	Instead of focusing primarily on military sales to the countries involved in conflicts, work with these and other countries as broad based trading partners. Our focus should be on selling raw materials, products and expertise to help other countries develop to become better customers for all our industries; and purchasing raw materials, products and expertise from their industries for those areas where we have deficiencies in resources or competition in our country. (Department of Commerce) (Department of Defense)	UP-2, UP-4, UP-5	The goal of the U.S. should be to improve the standard of living for our citizens, as well as the citizens of the countries we are trading with, while reducing political tensions around the world.	X	X			

Objective	<u>Description of Proposed Legislation or Policy</u>	<u>Universal Principle</u>	<u>Benefits of Legislation or Policy</u>	<u>Mid-Term 2026-2027</u>	<u>Mid-Term 2028-2029</u>	<u>Mid-Term 2030-2031</u>	<u>Mid-Term 2032-2033</u>	<u>Long-Term Plan</u>
10. Fix Our Foreign Policy	By utilizing the Spiritual Principles of universal cooperation, peace, and prosperity, the U.S. would not use our military power to attempt to confiscate or control the resources of other countries without their consent, as some have suggested. Instead, we would use our military to protect our nation and its citizens from those nations and individuals who consistently commit Sins Against Humanity . (Department of State) (Department of Defense)	UP-2, UP-4, UP-5	Promotion of the Spiritual Principles of universal cooperation, peace, and prosperity rather than the inevitability of war.	X	X			
11. Fix Our Foreign Policy	The U.S. State Department, the intelligence community, and the military should continue to have the ongoing task of monitoring and evaluating the political and military developments and deployments of foreign countries to ensure that the U.S. is second to no other country in military preparedness, but at the same time work toward the continued reduction in nuclear armaments and military conflicts around the world. (Department of State) (Department of Defense)	UP-2, UP-4, UP-5	Promotion of the Spiritual Principles of universal cooperation, peace, and prosperity rather than the inevitability of war.	X	X
